Data Scientist | Machine Learning Engineer

PROFESSIONAL SUMMARY

- Ambitious Artificial Intelligence student specializing in Intelligent Data Science with a strong passion for Machine Learning and Data Analysis.
- Experienced in building and evaluating predictive models using Python, Scikit-learn, and XGBoost on real-world datasets.
- Top academic performer — ranked 1st in class for 3 consecutive semesters; awarded Top Student Certificates 3 times.

EDUCATION

Horus University – Egypt

Egypt

Faculty of Artificial Intelligence & Informatics

Expected Graduation: 2028

- Major: Intelligent Data Science
- GPA: 3.95 / 4.00
- Class Rank: 1st

TECHNICAL SKILLS

Programming Languages: Python, Java, C++

Data Analysis: Pandas, NumPy

Data Visualization: Matplotlib, Seaborn

Machine Learning: Scikit-learn, XGBoost, Ridge Regression, Logistic Regression, KNN, SVM

ML Concepts: Data Preprocessing, Feature Engineering, Model Evaluation, SMOTE, Cross-Validation

Database: MySQL, SQL, ER Modeling, Database Normalization (1NF, 2NF, 3NF)

PROJECTS

House Prices Prediction

Ridge Regression | Python, Scikit-learn, Pandas

- Built a regression model using data preprocessing, feature engineering, and Ridge regularization to predict housing prices.

github.com/shawkymmarya/House-Prices-Prediction-ML

Titanic Survival Prediction

Logistic Regression, SMOTE | Python, Scikit-learn

- Developed a binary classification model with Logistic Regression and applied SMOTE to handle class imbalance.

github.com/shawkymmarya/Titanic-Survival-Prediction-Logistic-Regression

Customer Churn Prediction

KNN | Python, Scikit-learn

- Predicted customer churn using K-Nearest Neighbors with feature scaling and model evaluation techniques.

github.com/shawkymmarya/customer-churn-prediction-knn

Car Price Prediction

KNN Regressor | Python, Scikit-learn

- Built a KNN regression model to predict car market prices based on vehicle features.

github.com/shawkymmarya/car-price-prediction-knn

Adult Income Classification

SVM | Python, Scikit-learn

- Classified income levels above or below \$50K using Support Vector Machine on the UCI Adult dataset.

github.com/shawkymmarya/adult-income-svm-classification

Bank Marketing Prediction

XGBoost | Python, XGBoost, Scikit-learn

- Predicted customer subscription to term deposits using XGBoost with hyperparameter tuning.

github.com/shawkymmarya/bank-marketing-xgboost

Hotel Reservation System Database

MySQL, SQL

- Designed and implemented a Hotel Reservation System using MySQL, including ER modeling, normalization to 3NF, and SQL queries for rooms, reservations, payments, and guests management.

github.com/shawkymmarya/hotel-management-system

CERTIFICATIONS & TRAINING

Artificial Intelligence & Machine Learning Diploma

Route Academy

Top Performer in the program

- 4-month intensive program with hands-on experience in ML, Data Analysis, Data Visualization, and Deep Learning fundamentals.

Introduction to Data Science

Cisco Networking Academy

- Completed introductory course covering data analysis, data visualization, statistics, and machine learning fundamentals.

EXPERIENCE & ACTIVITIES

NASA Space Apps Cairo 2025 – Global Hackathon Participant

Cairo, Egypt — 2025

- Built AI-based solutions as part of an international team in NASA's annual global hackathon.

InnovEgypt Program

ITIDA & TIEC

- Completed 45-hour training in innovation, entrepreneurship, and business model development.
- Developed a startup idea based on Artificial Intelligence and Data Science applications.

HONORS & ACHIEVEMENTS

- Ranked 1st in class for 3 consecutive semesters at Horus University.
- Awarded Top Student Certificate 3 times by the Faculty of Artificial Intelligence & Informatics.
